REAL-WORLD SCENARIO CODING CHALLENGE

PT. SKYSHI DIGITAL INDONESIA

Build Your Career in IT

Build Portfolio for Better Future Career

We understand IT Industry need more great engineer. We are here to help you measure your skills as IT engineer using monthly coding competition

REAL-WORLD SCENARIO TEST

**We are here to bridge the gap
between company and developer**

This is an event where we invite developers to build real apps based on common problem on industry.

Winner criteria will be based on total scenario passed, coding performance and coding scalability.

REAL-WORLD SCENARIO CODING TEST

FINALLY! The coding test for engineer that the IT industry waited so long...

Engineer will Create Real Apps

Coding test using real world scenario. Build real frontend, backend mobile application to test your engineer skill level.

Test Your Coding to Get Result Passed/Failed

See detail what scenario already passed, or still failed. Fix the failed code then re-submit the apps to get 100% passed.

Refactor the Code to Improve Your Apps Response Time

Refactor your code to get faster apps response time

TEST EXAMPLES

01

FOR BACKEND

- Build API
- API Validation
- Log
- Integration 3rd party
- Database
- and many more ...

02

FOR FRONTEND

- Convert design to layout
- API Integration
- Creating Form
- Navigation and Routing
- Validation and Error
- and many more ...

03

FOR MOBILE DEV

- Convert design to layout
- API Integration
- Creating Form
- Navigation and Routing
- Validation and Error
- and many more ...

DEVELOPER WILL LEARN

CODE REFACTOR

Dev will learn the importance of code refactor to achieve the best Results

DEPLOYMENT

Dev will learn how to deploy code on production using git or docker

SCALABILITY

Dev will learn to make the code to handle more concurrent request

SECURE

Dev will learn how to make code to be more secure

PERFORMANCE

Dev will learn how to optimize the code to send faster response to user

CODING CAN BE FUN 🤖

Dev will learn that coding can be fun when they can compete with other developpe

BENEFIT FOR HIMA AND STUDENT

CODING PRACTICE BASED ON COMMON PROBLEM IN INDUSTRY

Introduce student how to code based on common problem in industry. Student can feel the real world scenario via competition

CREATE SPECIAL EVENT AT HIMA

Create special event at himpunan to satisfy student who passionate in software Engineer

INTERNSHIP PREPARATION

student can use devcode challenge for simulation and coding test preparation for internship

COMPANY TALENT ACQUISITION

Company will see your skills and consider becoming a future developer

LET'S COLLABS WITH US

Media Partner

You can support us by sharing our code challenge info on your social media channel

Event Collaboration

We can support your coding event program using our platform

Event Collaboration Coaching

We can support you a coaching preparation and evaluation on our Event collaboration

What You'll Get

- Community Logo Placement on Instagram, Website, Leaderboard
- List of Participant name + email

MEDIA PARTNERSHIP

Contraprestation

Facilities

- 1 Logo Inclusion in Publication Designs on Devcode and Skyshi Social Media
- 2 Mention of Names/Social Media Accounts of HIMA/Communities on Devcode and Skyshi Social Media

Description

All Design Publication

All Devcode and Skyshi's Social Media

EVENT COLLABORATION

Contraprestation

Facilities

- 1 Support the strengthening of Human Resources capabilities for students
- 2 Provide a special Devcode event platform held with HIMA
- 3 Provide a special Leaderboard on the regular Devcode event platform if the number of participants meets the requirements
- 4 Providing Leaderboard and Coaching on special Devcode event platforms organized with HIMA
